

Here is a further update of the progress re the new/replacement information panels for Otterhead Lakes. I am pleased to report that the panels were completed by the manufacturers & delivered to us on Monday this week & subsequently taken over to Otterhead on Weds (see photo attached). We are hoping to get them installed within the next couple of weeks = determined by availability of the group of "volunteers" who are able to undertake this type of work to meet specific H&S & accessibility requirements. I'll send you a photo once they are installed. THANKS to Ninevey Trust for their support in enabling us to get this project done.
regards, John
