

Funding from the Nineveh Trust has made a great positive impact to our Wildlife Watch Group Sessions. It enabled us to deliver a variety of sessions on our reserve, with tasks including:

- Snails and slugs session, looking at facts and making slime
- Fungi Hunt
- Nuts and Berries session, including natural dying
- Bird Song session and Easter egg hunt
- Creating seed bombs and planting

In these sessions, we have had an average 10-12 attendees, with supportive feedback from children and their parents of how engaging and enriching sessions are.

Wildlife Watch continues to inspire young people, teaching them about wildlife whilst providing a space to make new friends.

Thank you very much for providing us the opportunity to deliver these sessions.
