

End of Project Report – Nineveh Trust

In 2024, the Nineveh Trust provided us with a grant to construct a new building containing 2 new classrooms and a storage area.

Construction began in September 2024 by a company called Keops who have built a number of cabins for us around our site.

The shell of the building went up quickly and we could quickly see just how big and useful it was going to be.

We are now just working on completing the inside of the building. The electrics and water have been installed and we are hoping to add a kitchen very soon.

By March/April time, we should see the first student groups start to make use of the classroom space and we are looking forward to inviting more students to join us as we will have the additional teaching space.

We are so grateful to the Nineveh Trust, as well as other funders, for supporting us which has enabled us to purchase and construct this new building. This will mean that new students will be able to join the Wildgoose family and learn new skills, make new friends and live their best lives.
